2011 is a life-changing, threshold year that will keep you on your toes! It is a year of endings and beginnings, cautions and questions. It will ask you to think fast and act quickly. The world is in accelerated transition now and everything and everyone is being affected. Join Pepper and Gaia for a lively and interactive day filled with specific details about the year ahead.

This year's topics will include:

- **The World Stage:** Who's in charge and what side are they on? Secret veils begin to lift. Loose ends and Liar's Poker.
- **Global Challenge vs. Catastrophe:** Truth emerges from the cracks, literally. Earth changes, climate change and more.
- **Food vs. Nutrition:** Regenerating the body's stalled wisdom, the safety and future of the world's food supply, magnification leads to purification.
- **Relationships:** Resilient bonds, links and liaisons, the changing family structure. An end to estrangement – a way in, out, through or around.
- **Spirituality and Religion:** overcoming fragmented truths and shattered beliefs, unconsciousness still feeds the collective actuality, advances in reality quaking.

- **A Quality Life:** Making choices, a disposition for knowledge, life extension, setting the tone prevents sounding the alarm, living with vision and purpose.
